The following is extracted from the Unites States Government
theport on the New Parker Sarver First Tails:

"On the whole, this Train is considered a very great innorovement over the old train of preeder or match, and is susceptible of
ranges of application to military and civil purposes or cases, far
which, more important, more numerous and useful, than the old
train now in use could ever be applied to."

This AMERICAS PATENT FOR SALE.

This invention has been patented in the United States; also
patents have been secured in Great Britain, France and other
countries in Europe. The inventors are decience of effecting a
sale of the patent right for the United States to the Government,
or to a private company, together with the pseudlar machinery see of the patent right for the United States to the Government, or to a private company, together with the reculiar machinery and material necessary for the complete construction of both the Cartridge and the Safety Fuse Train, and would call the attention of parties interested in breech-leading arms, powder manufactures and mining and blasting companies to the superior advantages of these inventions over anything of the kind hitherto manufactured. For further particulars, address Gower & Milles Inventors and Patentees.

WALLACK'S THEATER .- Mr. and Mrs. W. J. Florence commenced an engagement at this house on Mondoy night, which promises to be a pleasant one for the ic, and a profitable one for the actors.

Mr. Florence plays Irish parts much to the satisfacsees of his auditors, and some of his little bits of acting are admirable. He sirgs, dances, and does all the old stereotyped business of Irish comedians in a manner that some of the more pretentious of them would do well to study. He is successful and popular.

Mrs. Florence is an actress of no ordinary ability, whose peculiar excellence lies in the delineation of disheet parts. She is very pleasing in personal appearance, graceful in all her gestures and movements, and the mobility of her features enables her to instantly adapt her countenance exactly to the exigencies of the wacter assumed for the moment. She sings pleasingly, and dances with unusual grace. In a number of her plays she assumes a dozen or so of characters in the course of the same play, and the quickness of the change of costume, and the total transformation of manner, guit and accent, are comething bordering on the marvelous. The audience last night seemed to be delighted, and applauded and encored a number of the dances and songs. Mr. Harry Russell, too, and Mr. Gresvenor, in "A Lesson to Husbands," came out unexpectedly strong in two extravagant parts, and both acted with a great degree of comic force, making a decided sensation.

The pieces performed by the Florences are all of them light, and, what is greatly to the purpose this hot weather, are short. Plenty of songs and jigs are insersperced, and the whole entertsimment is just the thing for the torrid temperature. Crowds cannot be hoped for, for people would not crowd a theater at this time of year to see Blake and Burton as Othello and Isgo, but a good, comfortable, paying business may be confidently predieted. Several new and original plays are in preparation by several gentlemen of several cities, all of which will be duly announced.

MARINE AFPAIRS.

VELLOW PEVER AT QUARANTINE. Within the past fwo days three vessels have arrived here with yellow fever on board. About 2 o'clock last Monday morning the ship Susan, acting Capt. Williamson, from Matanzas, with sugar, for Greenock, Scotland, put into this port in distress, her Captain (Dun-leary) having died when three days out from her port of departure, of yellow fever. Two sailors died of the same disease three days before making this port, and five others were down sick, and sent to the Marine Hospital as soon as the ship arrived. The Susan was immediately sent to the Lower Quarantine anchorage, her crew landed at Marine Hospital, and ship keepers placed on board the vessel.

The ship Grotto, late Capt. Nicolls, from Sagua la Grande, with sugar, for Falmouth, England, also put into this port on Monday, with yellow fever on board. Capt. Nicol's died on the night before the ship arrived; two men died on the passage, one on the first night out, the other last Saturday night, of the same disease. Seven of the crew being sick, were sent to the Hospital, and the ship was immediately towed to the Lower Quarantine. Mrs. Nicolls, with her two children, are now at the Marine Hospital. The body of her husband, which she had caused to be sewed up in canvas and pitched over, in order to bury it on shore, was landed and interred soon after arrival.

Yesterday morning the bark Greenland, Capt. Varnem, from Havana, bound hither with sugar, arrived at Quarantine. The captain was taken to the Hospital in the last stages of the fever, and is not likely to re cover. He lost his wife and child at Havana by the same disease, and brought their bodies home, intending to bury them in the little family tomb in Maine. Ere this it is probable that all three of them lie side by side in one common grave. The vessel has been sent to keep company with the other infected ships.

Bench.
On the second trial of this cause, before Chief-Justice Oakley, the defendant's counsel took 82 exceptions, which he made a ground for appeal. On Saturday last Judge Bosworth delivered an oral cpinion in the case, in which the verdict of the Jury in favor of the plaintiff was affirmed, with costs. If the defendant wishes to contest the matter further he must now go to the Court of Appeals, first giving security for costs and judgment.

The Arctic Fire Insurance Company art. John S. Hicks.
On the 4th of March last, Judge Ingraham granted an order for the examination of the defendant as a judgment debtor on supplementary proceedings. It was mide returnable on the 14th of the same month, but plaintiff discovering that it was returnable on Sunday, had it altered to the 15th, and gave defendant verbal notice of the alteration. On the 15th he was not present. Upon application of plaintiff occursel, Judge Clerke granted a certificate, and a faither order for defendant to appear on the 15th of March, but again he was not in attendance. Judge Clerke then granted an order to show cause why an attachment/should not issue, upon the return of which defendant coursel objected to the issuing of the attachment on the ground of irregularities; that the first order was made returnable on Sunday, and that the affidavit of service was not read. After hearing the argument, Judge Davies ordered the attachment to issue, from which order defendant appealed. Judge Ingraham, at General Term, delivered the following opinion:

If the order for the debtor to appear in the supplementary proceedings was returnable on Sunday, it was not a contempt on his part not to appear on Monday, the order was multity. The objection that the affidavit was not served with the order should have been taken on the return of the order. He had no right to discley the order for that cause. The next order, for the 19th, made by Judge Clerke, appears to have been founded on the previously served affidavits. The defendant was in contempt for discleying it. Even if it was erroneous he had no right to discrete the sufficient to purge the contempt, or, if not, to excuse him to the order does not not served with the order should the forder do re reason for denying the motion. The order appears the sufficient to purge the contempt, or, if not, to excuse him to the forder does reason for denying the motion. The order appea

COURT OF GENERAL SESSIONS—TUESDAY.—Before the City Judge.

The July term of this Court commenced this morning, but as usual on the first day of the term there was no Grand Jury. Judge Phillips, one of the counsel for Billy Mulligan, of California Vigliance Committee renown, moved for a postponement of the trial of that worthy gentleman for the assault on Col. Webb at the Metropolitan Hotel, on the ground of the absence of a material witness, who had gone to Virginia. The motion was cancestly copposed by the Assistant District Attorney. Mr. T. A. Torn incon, associate counsel for Mulligan, argued that Webb had belenged to the San Prancisco Vigliance Committee, had himself trampled upon all law, and therefore could not consistently claim protection and refuses at the hands of the law in New York. On that ground he advocated the postponement of the trial. Judge Russell leaned favorably toward Mulligan, and postponed the trial. The parties are to meet at the District Attorney's office on Thursday, when the testimony of Col. Webb, the complainant will be taken de beac erse.

A young German of respectable appearance, who refused to give his name, and was indicted as John Doe, was tried for an attempt to break into the jewelry store of Rait & Co., No. 261 Broadway, early on the morning of June 18. He was arrested before he had entered the premises. The testimony against him was very positive. He was convioted and remanded for sentence.

John Thompson, charged with an assault on Philip Wolfe, with intent to kill, was acquitted.

William Leggett was tried for shooting at Jeremiah Cokely, on March II, in Chaihan street. Cokely was walking quietly along the sidewalk, when, as he alleged, the prisoner, whom he had never seen been before, drew forth a pistel and shot him. The ball took effect in the side, and he was confined for two month in the City Hospital. The defense contended that the prisoner was carrying the pistel, and that it went off by ecident. The Jury had not agreed at a late hour.

Business at the Stock Board for the second half of the year opened with a moderate degree of animation and a buoyant market for some of the leading fancies. The movement, however, appears still to come mainly from the shorts, there being but few outside orders, and no prominent bull operator disposed to act with any vigor. A large number of short contracts have been settled up within a short time, one house alone, it is reported, having taken in 15,000 shares of stock to be delivered within ten days. The public continue quite indifferent to the fluctuations of the Board, although for investment securities there is still a fair demand. Some of the prominent bulls, it is said, have been selling prirately some considerable parcels of stock, which has increased the heretofore restricted amount of cash stock on the market. New-York Central was very active this morning, and advanced to 83], with sales of about 3,200 shares, of which 2,350 shares were on seller's option. Reading was also in fair demand, and improved to 46. Rock Island and Galens were both buoyant—the former going to 75, and the latter to 87.
The advices from the West are more favorable in regard to traffic, and this has brought in some buyers. Our advices in regard to the Galena dividend lead to the conviction that it will probably be 5 \$\psi\$ cent. Southern Michigan was firm. In Erie there was but little done, and the stock advanced | 4 cent. At the Second Board the market was quite inactive, and the advance of the morning was not sustained. There was no disposition to press stocks on the market in the absence of a demand, but the few sales made were at a decline of I to 1 P cant. In Bond transactions, there was not much done, and the market was without important change. La Crosse Land Grants have been a little scarcer, and the shorts are turning them at more than the usual difference. For the coupon due let August \$30 is freely bid, so that there would appear to be no doubt that the interest will be promptly paid. The closing prices in the street were: Erie, 174 @ 174; Reading, 454 @ 454; Central, 83 @ 834; Southern, 22 @ 224; Toledo, 33 @ 334; Hudson River, 264 @ 261; Rock Island, 741 275; Galena, 861 287; Mis-

There is now only £405,000 of Australian gold known to be on its way to England, and it is therefore probable that withdrawals from the Bank will be renewed in the course of the next day or two.

The accounts regarding the prospects of the surroup of France, Italy and Asia vary in character, but the disease has evidently extensively attacked the silk-worm in some directions.

The general aspect of the Stock market remains much the same as for the last day or two. There is very little doing in anything, and prices are weak all

much the same as for the last day or two. There is very little doing in anything, and prices are weak all round. The forthcoming Railway dividends are likely to be lower than ever, and it is questionable if the Great Western will pay any.

There is no special feature to notice in the English Stock market; business continues extremely inactive and flat. Consols, which closed yesterday at 95½ ½, are now quoted 95½ ½; the Reduced and the New Three per Cents are 95½ ½; Bank Stock, 219 221; India Bonds, 19/221/prem.; Exchequer Bills, 31/20 35/prem.

The annexed information in regard to Land Warrants is from Thompson's Bank Note Reporter:

"Land Warrants.—The demand for Warrants is steadily increasing, and will undoubtedly run up the market value to a high figure before the 1st of September, when several Land-Offices will be opened in the most desirable parts of the West. An act passed the last session of Congress, authorizes Land Warrants issued under the act of 1855 to be received in halt payment for the land on the railroad lines held at halt payment for the land on the railroad lines held at \$2.50 per acre, heretofore payable only in gold. This is an important law, and has advanced the new warrants to the same value as those under the acts pre-

vicus to 1855.
"The Land-Office at Council Bluffs, Iowa, reopened on the 16th of June, and there were a large number of applicants present. Advices from there say, 80 and 160s self readily here for \$1 per sere, and 180s for 95 cents. The Government receives but 1821e money for

cents. The Government receives but little money for its lands: they are all swept off by land warracts.

"In Kansas there is a more scuive demand—160 acres commanding \$100 cash or \$288 payable in one year, and secured by deed of land. The settlers there evince the greatest anxiety to secure their lands and homes before the sale in September, when they would otherwise be at the mercy of moneyed speculators from the East. The proclamation of sales to come off in June (but which were posponed to November at the request of the Kansas people), very effectually awakened them to a realizing sense of the danger they were exposed to. Now they have more money and are amitous to be prepared on the opening of the sales. In Michigan, two land offices open on the 16th of August. At Traverse City, on the western side of the State, there will be offered some of the choiceat grain lands of the State, and at Ionia also. Both these tracts are traversed by three railroads, the Grand lands of the Stare, and at Ionia also. Both these tracts are traversed by three railroads, the Grand Rapids and Indians, the Flint and Perre Marquette, and the Detroit and Milwaukee. And probably these railroad lands will be on the market at the same time. All these sales tend to make the market in warrants exceedingly active."

The receipts of Breadstuffs given below show a gain

upon the figures of last week, and the prospect is that these receipts will go on increasing. The shipments of grain from Chicago, for the week ending 26th June were 878,000 bush, all of which is now on the way to Buffalo or Oswego, and the place of these large shipments is supplied by receipts at Chicago full as large. The figures below show the receipts at Buffalo by lake to the 3d inst., at Oswego to the 2d inst., and at Og-

densburg to the 1st inst.: 1857. Whest, bbis.

Merrea, a 14 de Junio 20, de 1852.
At Chicago a steady improvement is observable in

general business, money is becoming more abundant, and for legitimate business purposes is in fair supply. The weather during the week has been favorable for agriculture, and less apprehension is felt for the crops. The receipts of Flour and Grain continue liberal, as

We learn from The Memphis Bulletin that, in addition to the plundering by the Secretary of State of some \$35 000, and the embezzlement of \$123,000 of bonds. that should be in the Controller's office, by-nobody knows whr -- there has been discovered by the Investi gating Committee a further plundering of \$200,000 by -and nebedy seems to know who-in the shape of coupons taken in the Bank of Tennessee. So far, then, there is found out to have taken place pilfering to the amount of some \$360,000.
